The Ideas Distillery

Let us take the strain of your Internal Audit requirements

We'll ensure your audits are scheduled, completed regularly and on time!

Organisations aiming for effective ISO-compliant Quality, Environmental and/or Health & Safety Management Systems have to perform Internal Audits. They are used to find weak links in their system as well opportunities for improvements.

Risk management is usually high on a company's agenda and Internal Audits - as well as being a requirement of the standards - plays an important role in protecting a business against risks, at the same time as driving continual improvement.

What we do

Our internal audit consultants will help you meet the demands of maintaining an effective Internal Audit function. We provide experienced auditors who are all registered with the International Register of Certificated Auditors (IRCA) and are IRCA-certified Lead Auditor trained in ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018.

Most important, our audits are focused around adding value to your business by providing an independent assessment to identify improvements, assist in developing efficiencies and share best practice protocols in your sector.

We will work with you to devise an Internal Audit plan around the standards you operate, the business processes that you run, and the Standard's requirements to ensure that you are complying fully at all times. We compile comprehensive reports of our audits and run through any significant findings both during and after the audit.

Why outsource your Internal Auditing?

A lot of organisations decide to outsource Internal Auditing to take advantage of a number of benefits:

- ✓ Your current Internal Audit programme may only focuses on process compliance but does not detect any business issues or opportunities for improvement.
- ✓ There are no qualified or experienced resources available within the company to plan and conduct effective and value-adding Internal Audits.
- ✓ A company often wants an impartial person reviewing their systems.
- ✓ It is often more cost-effective to get the specialist know-how through outsourced Internal Audit than bringing in a new employee, or training current staff.
